2600 Bull St.
Columbia, S. C. 29201

Dear Fran:

On behalf of the South Carolina Division of The American Cancer Society please accept this letter of support in reference to the Assist Project.

The South Carolina Division is fully aware of the magnitude of the need to reduce tobacco use in South Carolina since Lung Cancer is the number one cause of cancer deaths in South Carolina, as well as the nation, each year.

The American Cancer Society has long been a leader in the fight to reduce cancer deaths from smoking or associated tobacco use. This has been evidenced by the many programs which we have developed over the past decade to bring smoking hazard awareness programs to the public, both young and old.

Please be assured that we are committed to the Assist project and will participate and collaborate with DHEC in any way possible, whether it be with materials, programs, staff for training and planning operations or any other way in which we can be of assistance to you.

The South Carolina Division is fully confident of S.C. DHEC's ability to fulfill the Assist initiative and administer the project funds. We are looking forward to a mutually beneficial working relationship with DHEC and are certain that by working together, the people of South Carolina will receive the full benefits of the Assist Program.

Sincerely:

Joseph "Buddy" Jenrette

Dr. Joseph (Buddy) Jenrette, President
